SECURITY CONSULTANCY

Sentry Solutions offers security and safety consultancy and has knowledge and expertise in providing security and safety risk management solutions to many different industries. Our highly competent and specialized advisors can provide the highest quality service to you. We offer the following security consultancy services:

Security Risk Assessments, Audits, and Surveys

Sentry solutions identifies, analyses and understands information assets, the possible impact of security risks, weaknesses and threats in order to apply appropriate security measures.

Policy, Procedure Development

Sentry Solutions expertise can plan and develop better policy and procedures that lead to a smooth, efficient and effective workplace.

Physical Security System Design

Sentry Solutions can design a system that protects the organization from unauthorized access to facilities, equipment and resources to protect personnel and property from harm and damage.

Emergency Planning

Sentry Solutions expertise can develop courses of action to mitigate the damage of potential events that could endanger an organization's ability to function. Such a plan should include measures that provide for the safety of personnel and, if possible, property and facilities.

Evacuation Planning and Response

Sentry Solutions can design a system that protects the organization from unauthorized access to facilities, equipment and resources to protect personnel and property from harm and damage.

Loss Prevention Procedures, Audits, and Investigations

We are able to establish a Department-wide, uniform loss prevention program designed to reduce the number of work-related injuries to employees and damage to materials or property due to accidents and vehicle crashes; establish uniform operational plans; and delineate responsibilities for maintaining a safe working environment for employees.

Consultation Regarding Improvement of Communications and Information Security

We can consult on ways to increase effective and efficient communication techniques to enhance connectivity in the organization. Sentry solutions can also provide innovative ways on how to protect, secure and safe-keep the proprietary information that a company has stored in its systems.
